

Literacy Assessment Project Grade 3 2013-14 Mineola U.F.S.D

P-O-S-E©, F & P Benchmarks, NWEA Reading, ELA

Carol A. Sullivan, CCC SLP, Consultant February 2015

Introduction Grade 3 2013-14

Three Baseline Literacy-Related Measures + ELA Grade 3 Mineola U.F.S.D. 2013-14

- * All available Grade 3 students were baseline-tested in 2013-14 on the P-O-S-E, F & P Benchmark, NWEA MAP RIT. Among Grade 3 students, 180 took all three baseline tests as well as the year-end NYS ELA. (Table 1)
- * The mean Grade 3 2013-14 P-O-S-E baseline error score of 17.4% (n=180) exceeded slightly (1.1%) the 2012-13 Grade 3 baseline of 16.3% (n=196) and exceeded significantly the POB 2006-7 Grade 3 Baseline of 12.3% (n=275)
- * The mean F & P Benchmark 2013-14 Grade 3 baseline score of 14.4 or N+ exceeds the F & P norm of N for beginning Grade 3. The 2012-13 Baseline Benchmark (n= 191) was 13.4 or M+ consistent with end of Grade 2.
- * The mean baseline NWEA MAP RIT for Grade 3 2013-14 was 191.3. The same baseline score for 2012-13 (n=191) was 191.8, virtually identical. Baseline NWEA Reading scores for both years exceeded the NWEA Reading 2011 Grade 3 normative value of 189.9.

Observation: unrestricted population 2013-14 Grade 3 baseline Benchmark and NWEA Reading scores are grade-appropriate. P-O-S-E baseline scores are comparable to 2012-13 data.

Grade 3 Mineola U.F.S.D. Literacy Baseline Scores 2013-14 Descriptive Statistics (n=180)

	% POSE	Benchmark	NWEA Read.	ELA	ELA raw

Count	180	180	180	180	180

Table 1

Takeaway 1 Baseline Data:

- * Baseline scores on the P-O-S-E, F&P Benchmark and NWEA Reading for Grade 3 2013-14 were:
 - * A. In agreement with beginning grade-appropriate norms for all three tests.
 - * B. Consistent with data for Grade 3, 2012-13 with the exception that 2013-14 baseline Benchmark scores for ALL (180) Grade 3 students were a full letter grade **higher** than the prior year.

RTI Grade 3 2013-14, 2012-13

P-O-S-E, F & P Benchmark, NWEA Reading

Significant Grade 3 RTI Improvement in P-O-S-E, Benchmark and NWEA Reading scores for 2013-2014

- An administrative decision limited P-O-S-E RTI testing in 2013-14 to only those Grade 3 students with error scores having low, mid- and high intervention priorities. Consequently, the total n for inter-test, baseline-RTI comparison that year was reduced to n=96 creating a negative baseline bias.
- * A statistically significant improvement in RTI for Grade 3 literacy 2013-2014 was measured on the P-O-S-E, Fountas & Pinnell Benchmarks and NWEA MAP RIT. Table 2 presents all 2013-14 matched student Baseline - RTI literacy scores (n=96).
- * Table 3 shows comparable data from 2012-13 (n=191). Note the statistical artifact of better baseline scores on all tests.
- * Relatively poorer scores in 2013-14 are an artifact of restricting the RTI database to students with P-O-S-E error scores $\geq 12.5\%$

Observation: Average Baseline scores on P-O-S-E, Benchmark and NWEA Reading are lowered because the population for RTI was restricted to Baseline P-O-S-E scores $\geq 12.5\%$.

Table 3

Takeaway 2 P-O-S-E / Benchmark / NWEA:

- * Baseline vs. scores on the P-O-S-E, F&P Benchmark and NWEA Reading for Grade 3, 2013-14 all demonstrated:
 - * A. Significant improvement noted for all three tests achieving desired end-of-year performance levels (Table 2).
 - * B. Direct comparison with 2012-13 outcomes (Table 3) is affected by elimination of students from P-O-S-E RTI measures from 2013-14 data if baseline error score $\geq 12.5\%$.

ELA Grade 3 2013-14, 2012-13

Significant Improvement in Literacy Conflicts With ELA Test Outcomes in 2013-2014

- * In stark contrast to RTI gains in P-O-S-E, Benchmark and NWEA Reading, Grade 3, ELA performance scores declined precipitously in 2014 (lowest ELA % literacy-proficiency Grades 3-8) relative to 2013 (highest school ELA % literacy-proficiency Grades 3-8).
- * In addition, Grade 4, scoring highest as Grade 3 in the prior year, tied in 2014 for the second lowest ELA literacy proficiency score. (Chart 1, Table 4)

Observation: NYS ELA Scores for 2014 Grades 3 and 4 are inconsistent with other valid metrics of literacy.

Chart 1

Observation: NYS ELA Scores for 2014 Grades 3 and 4 are inconsistent with other valid metrics of literacy.

Mineola U.F.S.D						
Total % Meeting ELA English Proficiency Standards 2011-2014						
	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8
2014	33.0%	36.0%	37.0%	36.0%	38.0%	49.0%
2013	42.5%	40.5%	33.9%	42.2%	40.0%	39.7%
2012	67.1%	67.2%	68.8%	72.7%	56.2%	55.6%
2011	65.3%	72.0%	70.8%	63.0%	55.2%	57.9%

Table 4

Takeaway 3 NYS ELA:

- * Grade 3 NYS ELA literacy proficiency data for 2013-14 are discrepant from findings on the P-O-S-E, F & P Benchmarks and NWEA Reading assessment instruments for the same year.
- * Grade 4 NYS ELA literacy proficiency data for 2013-14 are discrepant from findings on the P-O-S-E, F & P Benchmarks and NWEA Reading tests for the prior year.

F & P Benchmarks Grade 3

2012-13; 2013-14

Chart 2 Benchmark- Grade 3 2012-2013 w/ 191 students paired data

- * On the X axis  are the letter grades used in presenting a *baseline* benchmark score
- * On the Y axis  are the number of students per level
- * Read the chart by coordinating the letter grade with the number of students achieving that score
- * The blue line  designates the 2012-2013 population of students *baseline* benchmark scores
- * The red line  designates the 2012-2013 population of student *RTI* benchmark scores

Observation: Full population 2012-13 Grade 3 benchmark scores achieved grade appropriate levels for both Baseline and year-end RTI.

Distribution of F & P Baseline v. RTI Benchmarks Grade 3 2012-13 (n=191) Mineola U.F.S.D.

Chart 3 Benchmark- Grade 3 2013-2014 w/ 186 students paired data

- * On the X axis  of Chart 3 are the letter grades used in determining a **baseline** benchmark
- * On the Y axis  are the number of students per level
- * Read the chart by coordinating the letter grade with the number of students achieving that score
- * The blue line  designates the 2012-2013 distribution of students *baseline* benchmark scores
- * The red line  designates the 2012-2013 distribution of student *RTI* benchmark scores

Observation: Full population 2013-14 Grade 3 benchmark scores achieved grade appropriate levels for both Baseline and year-end RTI –ONE LETTER GRADE HIGHER THAN THE PRIOR YEAR.

Distribution of F & P Baseline v. RTI Benchmarks Grade 3 2013-14 (n=186) Mineola U.F.S.D.

Chart 3

Observation: Baseline and RTI Benchmark scores are on-target for both years, one letter grade higher for 2013-14

Grade 3 F&P Benchmark Baseline vs. RTI Scores 2012-13 & 2013-14 Mineola U.F.S.D.

	2012-13 Baseline		2012-13 RTI		2013-14 Baseline		2013-14 RTI

Table 5

Takeaway 4 F & P Benchmark:

- * F & P Benchmarks demonstrated improvement of 3+ letter grades (13.1% n/26) in each of the two years 2014-4, 2012-13.
- * Baseline – RTI P-O-S-E, F & P Benchmarks, and NWEA Reading shows progress on all 3 measures in the year 2013-2014
- * This validated progress stands in contrast to the NYS ELA performance scores which fell significantly between 2013 and 2014.

NWEA Reading Grade 3 2013-14; 2012-13

Comparison of Baseline and RTI NWEA Reading in Grade 3 for 2013-14; 2012-13 (Tables 6,7)

- * Grade 3 NWEA Reading scores improved over Baseline testing results in both 2013-14 and 2012-13. (Table 6)
- * Grade 3 NWEA Baseline scores do not differ from 13-14 to 12-13. (Table 7)
- * Grade 3 2012-13 NWEA RTI scores are statistically significantly higher than 2013-14 (209 vs. 201). (Table 7)

Observation: For both years, NWEA Baseline and RTI scores meet or exceed grade-appropriate norms.

Mineola U.F.S.D. Grade 3	NWEA RIT Reading Baseline vs. RTI			
	2013-14 N=186		2012-13 N=191

Table 7

Takeaway 5 NWEA:

- * NWEA MAP Reading scores for Grade 3 demonstrated significant improvement in each of the two years 2014-4 and 2012-13.
- * The NWEA 2011 Grade 3 end-of-year norm, is 199.2. The Grade 2 end-of-year norm is 189.6.
- * Both Baseline & RTI NWEA MAP Reading scores exceeded NWEA 2011 norms for both beginning and end of Grade 3.
- * This validated progress stands in contrast to the Grade 3 NYS ELA scores which fell significantly between 2013 and 2014.

P-O-S-E® Grade 3 2013-14

(RTI testing limited by intervention priority status.)

P-O-S-E Analysis 2013-2014 Grade 3

- * Table 8 shows average baseline P-O-S-E results of all 3rd grade students in 9 classes by teacher and total .
- * Table 9 presents average RTI results analysis for the same students.
- * Table 10 gives average differences (improvements) between Baseline and RTI for Grade 3 and individual classes.
- * Table 11 lists average categorical differences (improvements) between Baseline and RTI for Grade 3 and individual classes.
- * Special attention should be given to the numbers in red which are actionable variables.
- * Restricting P-O-S-E RTI testing to Grade 3 students scoring $\leq 12.5\%$ resulted in the loss of data on 70 students, creating a negative score bias.

Observation: Average % 2013-14 P-O-S-E error scores are higher than 2012-13 because students with Baseline error scores below 12.5% were eliminated from RTI testing.

Observation: Successful reduction in 2012-13 Grade 3 P-O-S-E error scores was achieved with a population including ALL baseline P-O-S-E-tested students resulting in a lower mean baseline error score.

P-O-S-E © 2012-13	BASELINE	RTI
Mean	16.3%	9.3%
Standard Error	1.0%	0.7%
Median	11.7%	5.9%
Mode	6.7%	0.8%
Standard Deviation	14.4%	9.6%
Sample Variance	2.1%	0.9%
Kurtosis	183.2%	267.2%
Skewness	143.1%	160.9%
Range	70.8%	52.5%
Minimum	0.0%	0.0%
Maximum	70.8%	52.5%
Sum	31.20	17.83
Count	191.00	191.00
Confidence Level (95%)	0.02	0.01

Chart 4

Statistics 101

- * What is a statistical correlation ?
 - * A research strategy whereby variables are measured as they occur in the individuals studied. It looks at the relationship of one measure to another. Correlations range from 0 to +/- 1.00.
 - * For example:
 - P-o-s-e vs. F & P Benchmark
 - P-o-s-e vs NWEA
 - P-o-s-e vs ELA
 - NWEA vs Benchmark

A statistical correlation does not imply causality however it does indicate the presence of common factors influencing the compared scores.

Interpreting Correlations

- * Correlations range from -1.00 through 0.00 to +1.00.
- * A correlation of 1.00 indicates that one variable can be perfectly predicted from another.
- * If the correlation is positive it means the scores move in the same direction.
- * If the correlation is negative, it means the scores move in opposite directions.
 - * For example: The P-O-S-E correlates negatively with Benchmarks, NWEA and ELA because the P-O-S-E presents a % error score. The other tests are measures of items correct.
 - * The correlation may be interpreted by multiplying it by itself. I.e., if the correlation between 2 tests is 0.70 multiply $.7 \times .7 = 0.49$. This is called the coefficient of determination. It means 49% of the variance on test 1 is associated with the variance on test 2.

Observation: P-O-S-E Baseline 2013-14 Grade 3 correlates moderately well with Benchmark Baseline and ELA

Grade 3 Mineola U.F.S.D. Literacy Baseline Scores 2013-14 Correlations (n=180)					
	% POSE Base	Benchmark Base	NWEA Base	ELA	ELA raw
% POSE Base	1.00				
Benchmark Base	-0.62	1.00			
NWEA Base	-0.33	0.32	1.00		
ELA	-0.57	0.67	0.44	1.00	
ELA raw	-0.58	0.67	0.45	0.99	1.00

Table 11

Observation.: The restricted sample of Grade 3 2013-14 correlates moderately well with Benchmark Baseline on the same students.

Grade 3 Mineola U.F.S.D. Literacy Baseline v. RTI Scores 2013-14 Matched pair (Baseline P-O-S-E© >= 12.5%)Multiple Correlations (n=96)							
	POSE Base	POSE RTI	Benchmark Base	Benchmark RTI	NWEA Base	NWEA RTI	ELA
POSE Base	1.00						
POSE RTI	0.62	1.00					
Benchmark Base	-0.62	-0.38	1.00				
Benchmark RTI	-0.52	-0.37	0.88	1.00			
NWEA Base	-0.44	-0.28	0.68	0.53	1.00		
NWEA RTI	-0.44	-0.29	0.66	0.60	0.67	1.00	
ELA	-0.43	-0.29	0.65	0.62	0.64	0.67	1.00

Observation: When the top 12.5% of P-O-S-E scores are extracted from 2012-13 data, P-O-S-E correlations with Benchmark and ELA are comparable to Grade 3 2013-14 data.

<i>Grade 3 POSE_(c) ALL 2012-13 (N=191)</i>	<i>POSE Base</i>	<i>POSE RTI</i>	<i>Ben Base</i>	<i>Ben RTI</i>	<i>NWEA Base</i>	<i>NWEA RTI</i>	<i>ELA</i>

ELA Scale Score	-0.60	-0.50	0.66	0.65	0.66	0.67	1.00

Takeaway 6 P-O-S-E:

- * P-O-S-E RTI scores demonstrated an average 9.9% overall Grade 3 error reduction in 2013-14 (n=116 pairs).
- * This compares with an average 7.0% Grade 3 P-O-S-E error reduction in 2012-13 (n=191 pairs).
- * The P-O-S-E test of short vowel proficiency, a CCSS-designated foundational element of literacy, demonstrates moderately significant correlations with F & P Benchmark and NYS ELA scores, somewhat lower correlations with NWEA MAP Reading.
- * This validated progress stands in contrast to the Grade 3, 4 NYS ELA scores which diminished significantly between 2013 and 2014.

Grade 3 2013-14 Baseline vs RTI, matched pairs P-O-S-E, Benchmark, NWEA

- * On all Grade 3 Baseline-RTI tests (P-O-S-E, Benchmark, NWEA Reading) improvements were noted on RTI.
- * Mean P-O-S-E errors were reduced (10% growth) .
- * Mean Benchmarks rose from M to P (13% growth)
- * Mean NWEA Reading baseline gained from 185 to 198
- * The NWEA 2011 Grade 3 end-of-year norm, is 199.2. The Grade 2 end-of-year norm is 189.6.
- * NWEA growth is on-target. Using Grade 11 end-of-year norm 223.7 as RIT norm scale maximum: $13/224 = 6\%$ growth.

Observation: Grade level performance was achieved RTI on 2013-14 P-O-S-E, benchmarks and NWEA MAP Reading metrics.

Table 12

Conclusions & Recommendations

Conclusions and Recommendations 1

- * The P-O-S-E, F&P Benchmark and NWEA Reading tests for Grade 3 demonstrate consistent, grade-appropriate progress in response to intervention both within year 2013-14 and between years 2012-13 & 2013-14.
- * NYS ELA findings for Grade 3 and Grade 4 2013-14 appear inconsistent when contrasted with these findings for 2012-13.
- * Reconsider hierarchical importance of the NYS ELA in both curriculum development and teacher-effectiveness rating.

Conclusions and Recommendations 2

- * In order to provide maximum value in outcome analysis, P-O-S-E testing should not be selective within grade. I.e. The entire grade should be given both baseline and RTI tests.
- * Intervention should be based upon information derived from P-O-S-E Baseline measures using outcome results provided from group testing.
- * Data-based planning includes: team decision making, intervention block design consistent with the degree of severity and RTI testing to verify continuance or completion of intervention.
- * Intervention strategies should consider the compendium of test results on individual students in order to design the most efficacious course of remediation.
